# ErgoFocus

This Focus only controller from DeltaPix offers high quality and ergonomic solution for microscope automated focus. The design of the Eogofocus is based on feedback from end-users and physiotherapist for the best working ergonomics possible.

The Ergofocus has a very compact design of only 134 x 135 x 80 mm the ErgoFocus takes up little space. The ErgoFocus has USB connections, increasing its versatility and two ultra-accurate focus encoders giving the user the option to use the controller with right and left hand. The controller also has an OLED screen offering an accurate position readout.
